

# San Roque Creek Stewardship Project at Stevens Park

*Want to learn more about planting California natives at home?*

Join neighbors and volunteers at a series of native planting workshops and community restoration days at Stevens Park...

## **Saturday, October 7, 10am-1pm: “Native Plants are Good for Creeks”**

Celebrate Creek Week by helping to restore a section of San Roque Creek at Stevens Park. Do you live near a creek? Learn about planting natives at home to improve creek habitat and water quality. Find out more about non-native, invasive plants to avoid. Pizza provided for volunteers.

## **Saturday, October 21, 10am-1pm: “Right Plant, Right Place”**

with Carol Bornstein of the Santa Barbara Botanic Garden. Plant native plants along San Roque Creek and learn how to incorporate beautiful California natives into your own backyard. From 10am-11am Carol will give tips on designing your site and choosing native plants at this hands-on educational workshop and community planting day. Bagels and coffee provided.

## **Saturday, November 4, 10am-1pm: “Maintaining your Natives”**

Plant California natives and learn more about maintaining them at home throughout the year including installation of drip irrigation, weeding and pruning. Find out more about less toxic alternatives to pesticides and herbicides. Pizza provided for volunteers.

**Saturday, October 14: Native Plant Sale at the Santa Barbara Botanic Garden**  
(1212 Mission Canyon Rd.) Member Sale: 10:00 am-1:30 pm, Public Sale: 2:00-5:00 pm.

**Directions:** Stevens Park is located at 258 Canon Drive. From Upper State Street, turn onto San Roque Road, turn left onto Calle Rosales, right on Carrizo to Canon Drive.

The San Roque Stewardship project is coordinated by the City of Santa Barbara Creeks Division, in partnership with the Santa Barbara Botanic Garden, and is funded through a grant from Santa Barbara Beautiful and by hotel visitors through Measure B. The goal of this project is to build stewardship through community restoration and to educate residents about the water quality benefits of using native plants in backyards and gardens.
